

DELTA ENVIRONMENTAL®

Quick Disconnect Power Cord

For the use with D1P20-21, D1C20-21 and D2C20-21 Series submersible grinder pumps.

Quick Disconnect Power Cord Features

- Easy installations for D1P20-21, D1C20-21 and D2C20-21 Series grinder pumps
- No hard-wiring to a J-Box
- "Plug-N-Play" capability

Hard wiring the power from a grinder pump to a junction box has always been a difficult process for installers of low-pressure sewage systems. Fighting for elbow-room when trying to wire the connections to the pump can be involved. Opening the junction box then feeding the wires and cables from the pump into the junction box has always been time consuming and difficult. Until now.

Delta Environmental's "Quick Disconnect" power cord has revolutionized this method for installers of low-pressure sewage systems with the ease of a one step solution. The "Quick Disconnect" power cord allows anyone to simply plug the pump power cord into a compatible junction box within minutes, allowing for quick and safe maintenance during the life of the pump.
