DELTA ENVIRONMENTAL®

Commercial Wastewater Treatment System

ECOPOD-C® Advanced Wastewater Treatment

ECOPOD-C is the clear choice for a wastewater on-site disposal system. Its technology was tested under Standard 40 of NSF/ANSI International and met and exceeded Class 1 requirements with an average effluent quality of 9 mg/L BOD5 and 8 mg/L TSS.

ECOPOD-C directly contributes to a cleaner, safer environment using the bacteria nature provides. As a result of air being pumped into the system, the bacteria thrive and grow in much greater numbers than would occur naturally. This "overpopulation" of bacteria speeds the process of breaking down the sewage, making it safe for release into the environment.

ECOPOD-C significantly reduces BOD, TSS and nutrients in the wastewater. Nitrification and denitrification occur in a single tank.

ECOPOD-C Series uses a fixed film process which is characteristically stable, reliable and sturdy. Fixed film is a preferred treatment process in many areas for on-site wastewater treatment systems.

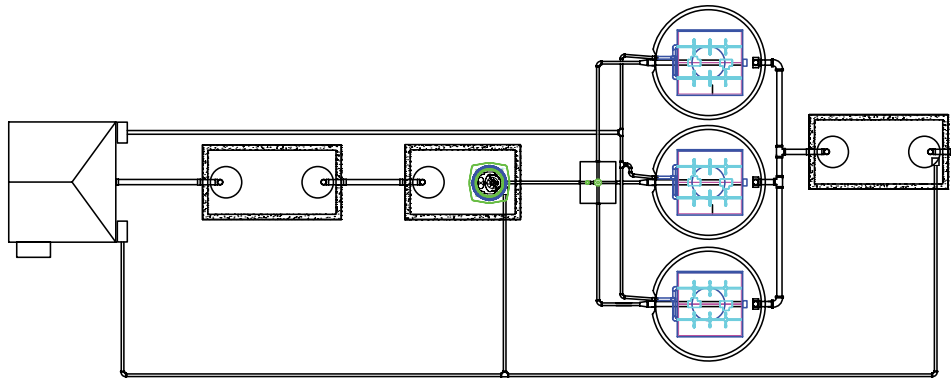

ECOPOD-C for Commercial Applications

The ECOPOD-C Series of pre-engineered wastewater treatment systems eliminate costly and lengthy custom design. No special expertise is required to design, specify and install a system matched to your needs. Consult our comprehensive, step-by-step design manual and let Delta help your next wastewater treatment project be a success!

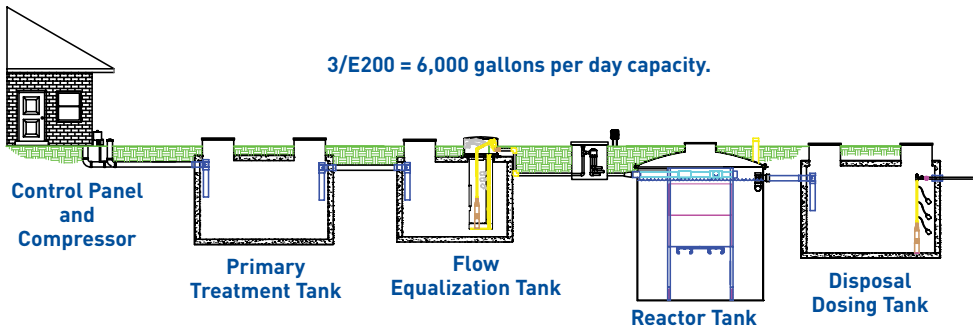

Pre-Engineered Treatment Systems	
Model	Capacity (gallons per day)
E100FF	1,000
E150FF	1,500
E200FF	2,000

The Future of On-site Wastewater—Available Today

3/E200 = 6,000 gallons per day capacity.

Why Use ECOPOD-C® Advanced Wastewater Treatment?

- Built with technology which meets NSF/ANSI International Standard 40–Class 1
- Disposes of wastewater quietly, efficiently, and with no odor
- Capable of BOD and TSS less than 10 mg/L
- No inner tank filters, screens or diffusers to service
- Unique air delivery system
- Remote mount air compressor
- Low initial capital cost and operation
- Integral air compressor/control panel design
- Complete on-site system designs
- 2-year limited warranty
- ECOPOD-C treatment systems are pre-engineered, requiring no special expertise to design, specify, or install
- Pre-configured, catalog systems allow for ease of ordering

Ideally suited for cluster designs, and small to medium commercial wastewater applications.

Other Delta Environmental® Products

A respected leader in wastewater treatment with decades of technical design and manufacturing experience, Delta Environmental is committed to the continuing development of new products in the 21st century.
